SUMMARY

A skilled computer programmer with a wide range of talents and abilities; possessing vast experience, though not in traditional settings. Equipped with the drive and intelligence to be an asset to any industry, but a passion for computer programming motivates a career path different than that which previous professional experience dictates.

TECHNICAL SKILLS

Languages:
- ➢ Experienced with C#, C++
- ➢ Knowledgeable with Java
- ➢ Proficient with HTML, CSS, Javascript, ES6

Applications:
- ➢ Experienced with jQuery, Bootstrap, Ajax, API's, Node.js
- ➢ Able to establish expertise in Express Servers
- ➢ Maintains a solid understanding of relational database design with MongoDB and MySQL
- ➢ Well-versed in React, Components, and JSX
- ➢ Able to establish a full APP using MERN & MVC structures

PROJECTS

Smite Tier List | https://github.com/tcutlip08/SmiteTierList |**https://smite-tier-list-tnc.herokuapp.com/**
- This app was inspired by a YouTuber who came up with an idea to create a tier list that displays characters based on the community's opinion. Going off that one idea I created many features to go hand and hand with the app as a whole
- Tools: React, MongoDB, Express, Google Auth, Drag and Drop

J-BOT | https://github.com/tcutlip08/project_3 | **https://awesome-project-3.herokuapp.com/**
- The purpose of this app is to create a safe gaming/learning environment for kids under the age of 13. We've created a gaming site where the parents are able to monitor and in the future control which games their kid is allowed to play.
- Tools: React, MongoDB, Express, FireBase

Smite Randomizer | https://github.com/tcutlip08/Smite_Randomizer | **https://smite-randomizer-tnc.herokuapp.com/**
- The purpose of this app is to return a random god/character based off a game called Smite. The inspiration came from wanting to use the randomizer in a twitch chat using my API & Nightbot (Bot that listens in chat)
- Tools: React, MongoDB, Express, API

EXPERIENCE

LongLeaf Communities | *Final Punch Manager* | Atlanta, Georgia | March 2017 — November 2019
- ➢ Completes project closeout including the creation of the trade contractor's punch list items and proper submission of closeout documents, meeting all deadlines.
- ➢ Proactively identifies and resolves potential problems in order to avoid unnecessary costs and delays.
- ➢ Assesses work being performed to ensure that all contract specifications were being met.
- ➢ Assures each property is complete and able to obtain a Certificate of Occupancy prior to its closing date.
- ➢ Manage and take care of undesirable imperfections for each property.

EDUCATION

Georgia Tech (Full Stack Developer/Boot Camp) — Atlanta, Georgia
Self Studies (Computer Programming) — Atlanta, Georgia
Associates Degree, **West Georgia Tech — Douglasville, Georgia**
